Summary

Aspiring Software Engineer skilled in Java, Python, and SQL, with a strong foundation in Data Structures and Object-Oriented Programming. Passionate about problem-solving and building efficient, scalable software solutions.

Education

Vellore Institute of Technology, Bhopal

June 2025

B.Tech in Computer Science Engineering (AI & ML), CGPA: 7.21

Technical Skills

Languages: Java, Python, SQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Technologies: REST APIs, JSON, HTML, CSS

Libraries/Tools: Pandas, NumPy, Scikit-learn, GitHub

Additional Skills: Problem Solving, Debugging, SDLC (Familiar)

Projects

Smart Bin Waste Management System

Dec 2023 – May 2024

- Developed an IoT-based real-time waste monitoring system using Firebase and Android Studio, improving efficiency by 30% (simulated).
- Implemented threshold-based alert system to trigger notifications when bin capacity reached 80%, reducing overflow incidents.
- Designed frontend modules and integrated backend services for real-time data synchronization.
- Collaborated in a team of 10 members, applying debugging and problem-solving techniques to enhance system reliability.

Diabetes Prediction System

Jan 2024 – Mar 2024

- Built a machine learning-based prediction system using Logistic Regression and Random Forest, achieving 80%+ accuracy.
- Processed 700+ records including data cleaning, feature selection, and normalization.
- Improved model performance by 15% using hyperparameter tuning and evaluation techniques.
- Developed modular and efficient Python code, focusing on scalability and maintainability.

Certifications

- MERN Full Stack Internship Program – ETHNUS
- Artificial Intelligence and Machine Learning – SmartInternz (Google Developers)
- Privacy and Security in Online Social Media – NPTEL

Achievements

- Solved 200+ problems on platforms like LeetCode and GeeksforGeeks, focusing on Arrays, Strings, and basic problem-solving techniques
- Developed a strong foundation in Data Structures including Arrays, Strings, Recursion, and basic Sorting Algorithms
- Participated in Flipkart Grid 5.0 and qualified for the initial screening round
- Participated in HackWizard Hackathon, gaining exposure to real-world problem solving and team collaboration
- Built academic and personal projects using Java, Python, and SQL

Activities

- Regular chess player, enhancing analytical thinking and strategic decision-making.
- Represented school at divisional level football tournament, demonstrating teamwork and discipline.
