Professional Summary

Results-driven Software Development Engineer with strong foundations in algorithms, object-oriented programming, data structures, distributed systems, and scalable backend development. Hands-on experience building production-ready AI applications, REST APIs, query systems, and automation workflows using Python, Java, C, SQL, and AWS. Proven ability to solve ambiguous problems, optimize performance, and deliver high-quality software in agile environments.

Technical Skills

Programming Languages: Python, Java, C, R, SQL

Computer Science Fundamentals: Data Structures, Algorithms, OOP, Complexity Analysis, Problem Solving

Backend Development: FastAPI, REST APIs, Streamlit, Microservices

Databases: SQL, Relational Databases, DuckDB, Query Optimization

Distributed Systems: Multi-Agent Systems, Scalable Architecture, Fault Tolerance

Cloud & Tools: AWS, Git, Linux, Tableau, Power BI, Visual Studio

Software Engineering: SDLC, Testing, Debugging, Agile Development

Education

Bachelor of Technology in Computer Science

Jul 2023 – Apr 2026

SR University

GPA: 8.4/10

Experience

LLM Post-Training Intern — Ethara.AI (Green Rider Technology LLP)

Feb 2026 – Present

- Developed scalable backend pipelines for model training and evaluation, improving response quality by 28%
- Designed and optimized 5,000+ structured datasets and prompt workflows, increasing consistency by 32%
- Built automated evaluation systems covering 1,200+ test cases, reducing failures by 25%
- Collaborated with engineers to debug distributed AI systems and reduce inference latency by 20%
- Delivered rapid software iterations in agile environments, shortening release cycles by 35%

Projects

Role-Based Chatbot

- Built secure distributed chatbot system with Role-Based Access Control for multi-user environments
- Designed hybrid query engine using SQL and RAG pipelines, improving response accuracy by 30%
- Developed scalable FastAPI backend services, reducing response time by 22%
- Implemented automated test pipelines detecting 95% regressions before deployment

Project Buddy – AI Multi-Agent Coding Assistant

- Built distributed multi-agent system using LangGraph with Planner, Architect, and Coder agents
- Automated SDLC workflow from requirements gathering to code generation
- Reduced prototyping time by 35% and manual effort by 40%
- Optimized architecture performance and reduced operational cost by 50%

ONE EYE – Smart Signboard Reader for the Visually Impaired

- Developed mobile application using OCR and image processing with 92% recognition accuracy
- Integrated multilingual translation APIs supporting 10+ languages
- Improved usability by 25% through adaptive image processing and voice navigation
- Built end-to-end solution using Flutter and Firebase backend

Achievements

- Selected for Amazon ML Summer School with exposure to AWS-based scalable ML workflows
- Participated in IBM Z Datathon 2025, solving real-world data engineering problems
- President, Microsoft Azure Developer Community – Organized 15+ technical workshops and mentored 360+ students

Certifications

- Microsoft Azure Fundamentals
- AWS Academy Cloud Foundations
- AWS Academy Cloud Data Pipeline Builder
- AWS Academy Cloud Web Application Builder
- Database Management Systems
- Computer Networking
