Profile

MCA graduate with hands-on experience in DevOps tools, AWS cloud services, and automation using CI/CD pipelines. Strong Understanding of the SDLC process applied in projects. Quick learner with basic Linux/shell scripting skills and a collaborative, process-oriented mindset.

Professional Experience

Internship(AWS/DEVOPS), *Microdegree*

10/2025 – 01/2026 | Bangalore

- Acquired hands-on experience with AWS services such as VPC, EC2, S3, IAM and Route53, deploying a scalable, highly available web application infrastructure.
- Gained practical knowledge of DevOps and container orchestration, implementing CI/CD pipelines with Jenkins, Git, Maven, Docker, and Kubernetes for automated and scalable deployments.

Artificial Intelligence and Data science Intern,

Scontinent Technologies

- Developed, trained, and implemented machine learning models using Python (Pandas, NumPy, Scikit-learn) to improve predictive analytics, classification, and forecasting accuracy.
- Performed data cleaning, transformation, and exploratory data analysis(EDA) on large structured and unstructured datasets using SQL, Excel and Python to derive business insights.

Projects

AWS Infrastructure Automation Using Terraform (VPC, EC2, NGINX)

- Used Terraform to automate the creation of AWS VPC, subnets, security groups, and EC2 instances.
- Installed and configured Nginx on EC2 to deploy and expose the application securely.
- Ensure secure, reliable, and automated infrastructure setup using Infrastructure as Code (IaC).

CI/CD Pipeline for Java Application

- Followed Agile methodology and SDLC phase to plan, build, and deploy a cloud-native Node.js app
- Deployed application using Jenkins for CI/CD
- Docker for containerization, Kubernetes for orchestration, and Maven for build management.
- Automated the build, test, and deployment pipeline to ensure faster and more reliable application delivery.

Skills

Version Control System: Git, GitHub

CI/CD: Jenkins

Containerization: Docker

Orchestration: Kubernetes, Minikube

AWS Cloud: IAM, EC2, S3, VPC, IAM, Route53, Cloud Watch, lambda

Monitoring: Prometheus and Grafana

Infrastructure as code: Terraform

Operating System :: Windows, Linux, Prometheus, Grafana(basics)

Certificates

AWS Solution Architect: (Micro Degree)

DevOps Engineer: (Micro degree)

Education

MCA, *Global Institute Of Management Sciences* 03/2024 – 11/2025 | Bangalore

BCA, *Govt First Grade College* 04/2020 – 09/2023 | Tumkur
