OBJECTIVE

To secure a challenging and dynamic position as a Software Developer where I can utilize my skills, knowledge, and creativity to contribute to organizational growth while continuing my personal and professional development.

EDUCATION

BRINDAVAN COLLEGE BENGALURU

Bangalore City University Karnataka

MCA, Dec 2024 - percentage: 77.37%

DODDAPPA APPA COLLEGE OF BCA

(Gulbarga University), Karnataka

BCA, Nov 2022 - Percentage: 74.5%

SKILLS

- **Frontend** : HTML, CSS, JavaScript, ReactJS
- **Backend** : Python, C, C++, Java
- **Framework** : Django Web Framework, Django REST Framework
- **Database**: MySQL, Oracle, MongoDB
- **Libraries** : NumPy, Pandas, Matplotlib
- **Tools** : Visual Studio Code, PyCharm
- **Soft Skills** : Strong analytical skills, teamwork, and problem-solving abilities

KEY ACHIEVEMENTS

Used GitHub for version control and project management

Debugged, tested, and optimized applications for performance

Regularly improved skills through mini-projects

CERTIFICATIONS

- The complete React and Redux course
- Python Full-stack course certificate

LANGUAGES KNOWN

English, Kannada, Hindi, Marathi

HOBBIES

Playing Cricket, Traveling

INTERNSHIPS

- The Complete Full Stack Web Development Internship In LearnNex Covered HTML, CSS, JavaScript, ReactJS
- Web Development Intern - Classicon Consulting Services Worked on a Travel Planner website
- **Python Full Stack Intern** **Jul 2025 - Jan 2026**
Pentagon Space Training Institute, Bengaluru
- Gained hands-on experience in Python, HTML, CSS, JavaScript, ReactJS, Django and SQL through practical assignments and real-time projects.
- Developed and tested web application modules under mentor guidance.
- Participated in mock interviews and daily HackerRank problem-solving sessions, enhancing technical proficiency and problem-solving skills.
- Collaborated with peers on coding challenges and project discussions, improving teamwork and communication abilities.
- Built mini projects challenges to strengthen logic and problem-solving skills

PROJECTS

GST Billing in Python Django

Developed software to manage the bill submission process in shops or organizations. It calculates different types of items with different GST values.

The system maintains inventory, saves bills for future reference, and prints hard copies for customers.

Online Job Portal

Developed a job portal for recruiters and job seekers using Python and Django. The application includes user registration, login, and job application functionalities.

A MySQL database was integrated to efficiently store and manage job postings and applicant details, ensuring smooth data handling and reliable system performance.

Travel Planner Website

Full stack web application developed using the MERN stack. Users can book travel, hotel, and room reservations.

The system consolidates all travel data (hotels, flights, tours, transfers) into one place and allows travel agents and customers to create customized itineraries.
